

**Replace this text with the title
(limited to 2 lines, Times Roman 14pt)**

AuthorLastName, Firstname¹ (11 points, centered, The name of speaker should be underlined),
AuthorLastname, Firstname², AuthorLastname, Firstname^{3*} (Corresponding author should be marked
the asterisk)

¹Institute, Organisation, City, Country(11 points, centered)

²Institute, Organisation, City, Country

³Institute, Organisation, City, Country

*E-mail: Provide corresponding author's E-mail address

Abstract

Abstract should be concise and factual, and state the purpose and originality of the research, the main results and major conclusions. **The expected length of abstract is about 150 words maximum.** Please do not move or alter the size or position of the sections in the template (Title, Author(s), Institute(s)). All submissions that do not correspond to this example and the respective template will not be included in the review process and will be returned to the sender.

Keywords: Provide 3 to 6 keywords as follows. Keyword 1; Keyword 2; Keyword 3.

1. Introduction

The length of the proceeding is restricted to 2 - 4 pages. Please use the template as indicated. If you use this file and just insert your text instead of the instructions, the correct format is assured.

References should be cited in the text as ^{1), 2)}.

2. Experimental

2.1 Subsection in experimental

Subsections should be numbered as 2.1 (and then 2.1.1, 2.2.2..., if necessary), 2.2. Each subsection should be given a brief heading in bold.

Figures must be included into the text (please assure a minimum resolution of 300 pixels and a size of max. 6,5 – 16,5 cm) otherwise the figure will not be reproduced.

Provide figures and tables in the appropriate places of the text with their captions as shown below.

Fig. 1: Outline of experimental apparatus

For equations, please use the equation editor and the font Times Roman 9 pt.

Prepare a PDF file from the manuscript file using a PDF producing software. Size of a file should be smaller than **2,000 kB**.

Never upload a word file. You should prepare a PDF file by yourself.
(If you do not have a PDF producing software. Please use search engines to find a free PDF maker.)

3. Results and Discussion

3.1 Mathematical expressions

Equations should be typed using Microsoft Equation Editor in Word.

4. Conclusions

Reference
